

Smart Card Reader – Directions for use

Important information! Please do not connect the card reader to the PC before installing KB Cryptoplus!!!

Cryptoplus installation

Here you can download KB Cryptoplus:

http://www.mojebanka.cz/en/certificates/instal_reader.shtml

Please follow this manual when installing KB Cryptoplus:

http://www.mojebanka.cz/file/en/Cryptoplus_KB_EN.pdf

Installation onto PC

1. Open the box containing the card reader and connect the gray end of the enclosed cable (marked with an arrow) to the card reader.
2. Connect the card reader to the PC's USB port (see picture below).
3. The card reader is powered through the USB cable. A flashing green light on the card will indicate that the reader is now ready for use.

Installation diagram

Guidelines for use

1. The card reader is designed only for indoor use, not for testing purposes
2. It is important to protect the reader from organic solutions, solvents, corroding agents, water and extreme climatic environments. Suitable range of temperature for use: +5°C to +55°C.
3. Do not open the reader, it is not allowed to change reader's mechanical and electrical parameters.
4. Clean the reader with a soft cloth.
5. This sign means, the device cannot be disposed of with regular household waste. For proper disposal of this device, you can return it to the place of purchase (free of charge) or take it to place for taking back electrical equipment and devices of company Retela, s.r.o., (www.retela.cz), eventually you can take it to a dangerous waste collection place in your city. If abroad, please respect the local regulations (e.g. recycling) of that country..

Package contents

1. Card reader in transparent case (service number is marked by symbol B/N: find it underneath of reader and sideways of the box).
2. 1.5 meter USB cable.
